How it Works:

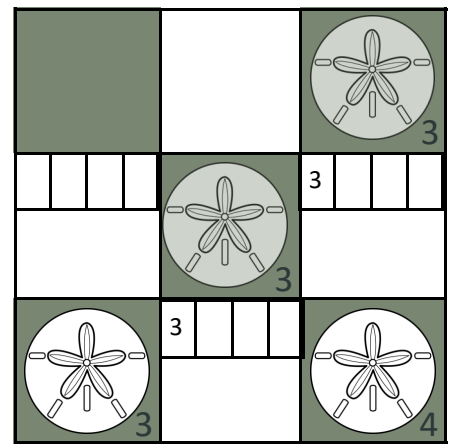

The goal is to complete the reading challenges on the squares as you move your checkers to the top row. Some boxes give 2 options with an OR, you only have to complete one of the options to complete the challenge.

As you “move” your checkers, keep track of it’s position by tracking the chip number in one of the corresponding boxes.

You must move one row of checkers to the last row before starting the next row. Each checker makes it’s first move into row 4 (counted from the bottom).

When starting a new row, take a different path for the checkers than you did previously.

Example:

With each checker that makes it to the end, you get 2 tickets for a prize basket. With each row of checkers that makes it to the end, you get a grand prize ticket.
